How to Turn Off Automatic Java Updates

To turn off the JRE Automatic Updates:

1. Click the Start Button (located on the lower left corner)
2. Click Computer
3. Under Hard Disk Drives, click Local Disk (C:) to open Windows Explorer
4. Click Program Files, then Java, then jre6, then bin
5. Right-click on javacpl.exe, then select Run as Administrator
6. Click the Update tab
7. Uncheck “Check for Updates Automatically”
8. You can also turn off the Mixed Code warning
9. Select the Advanced tab
10. Open the Security > Mixed code section
11. Select the Enable – hide warning and run with protections choice
12. Click OK

**How to Turn Off Java Updates Using the Command Line**

1. Click the Start button
2. In the Search programs and files box, type `c:\program files\java\jre\bin\`
3. Right-click `javacpl.exe`, select Run As administrator
4. Click the Update tab
5. Follow steps 7-12 as above
